Round Electric Hot Tubs

Price List March 2016

All of the tubs offered below are constructed in the classic hoop and stave style from 1.75 inch clear Western Red Cedar and are bound and fastened with marine grade stainless steel tensioning bands and fittings. Our traditional natural Cedar tubs are available fully assembled and ready for installation. In addition to our natural Cedar offerings, we also produce "state of the art" cold-moulded versions for our customers who desire a traditional look but with the convenience of modern materials. These versions feature a transparent, high strength, multi-ply laminate of specially prepared fiberglass cloth and epoxy resins laid up over a natural Cedar core. The end result is visually stunning, displaying the natural coloration of the Cedar and the intricacy of the wood grain, and is very low maintenance both inside and out.

Included in the price quoted for each tub is: circumferential seating, a recessed stainless steel drain, a tub light and a complete operating system. Our standard operating systems are designed and built around Hydroquip Systems spa controls. Each system includes a spa control, in either mechanical or digital format, an electric heater, a two speed pump, a cartridge filter, and two system isolation ball valves. Each control has additional outputs for an optional ozone generator or ionizer and a blower; additional outputs may be added to customize a system should you desire additional features. All of the operating system components are mounted on a composite base and prepiped and prewired ready for installation. The spa control automatically operates the heater, circulation pump and ozone outputs and the operator may select either time clock or thermostatic operating modes for these functions; remote actuators are provided for on demand control of jets, the tub light, and a blower or auxiliary circuit. Indicator lights are incorporated into each circuit for diagnostics and system components are assembled in modular fashion for ease of maintenance. ***Note: In addition to electrically heated units, we offer systems with gas heaters or heat exchanger based systems that are connected to a central hot water boiler; please call for pricing.**

<u>Tub Size</u>	<u>Item #</u>	<u>Assembled Tubs</u>	<u>Item #</u>	<u>Cold Moulded Cedar Tubs</u>
		Natural Cedar		
4 ft diameter x 3.0 ft depth	436EA	\$4230	436CM	\$6730
4 ft diameter x 3.5 ft depth	442EA	\$4375	442CM	\$6875
4 ft diameter x 4.0 ft depth	448EA	\$4500	448CM	\$6990
5 ft diameter x 3.0 ft depth	536EA	\$4880	536CM	\$7880
5 ft diameter x 3.5 ft depth	542EA	\$5050	542CM	\$8050
5 ft diameter x 4.0 ft depth	548EA	\$5300	548CM	\$8300
6 ft diameter x 3.0 ft depth	636EA	\$5650	636CM	\$9150
6 ft diameter x 3.5 ft depth	642EA	\$5885	642CM	\$9385
6 ft diameter x 4.0 ft depth	648EA	\$6150	648CM	\$9650
7 ft diameter x 3.0 ft depth	736EA	\$6625	736CM	\$10,625
7 ft diameter x 3.5 ft depth	742EA	\$6925	742CM	\$10,925
7 ft diameter x 4.0 ft depth	748EA	\$7230	748CM	\$11,230

Tub Covers (Our covers are UL and ASTM approved, and are equipped with locking safety fasteners.)

Model 4R Insulated Cover (fits all 4' diameter Electric Tubs)	\$270.00
Model 5R Insulated Cover (fits all 5' diameter Electric Tubs)	\$314.00
Model 6R Insulated Cover (fits all 6' diameter Electric Tubs)	\$330.00
Model 7R Insulated Cover (fits all 7' diameter Electric Tubs)	\$425.00

Jet Systems (Jet wall fittings, flex pipe, PVC fittings and air control valve required to install a complete jet system)

	Installed on Tub
4 Jet System	\$513.00
6 Jet System	\$765.00
8 Jet System	\$985.00

Blowers

1 HP Blower	\$145.00
1 1/2" or 2" Line Check Valve (PVC)	\$ 19.95

Programmable Silver Water Ionizer

\$695.00
